DVM Mentorship Program

In 2022, CareVet launched a DVM mentorship program that connects like-minded DVMs in the CareVet network to deepen clinical confidence, develop skillsets, and build relationships to last a lifetime.

If you recently welcomed a new associate to your hospital or think one of your veterinarians would benefit from the program as a mentor or a mentee, please share this simple survey with your veterinarian to express their interest in getting involved!

New Team Member Training

COAST has developed a suite of on-demand training programs to help supplement the onboarding process of new team members. Our Quick Start Toolboxes are aimed at equipping evergreen team members with the basic knowledge they need to hit the ground running.

We currently offer a basic onboarding program for team members and toolboxes specific for developing the skillsets of receptionists, technician/assistants and kennel attendants respectively.

Upcoming Events

We are incredibly excited to share that we are partnering with AnimalBiome on a new educational series surrounding animal microbiome. AnimalBiome made a huge splash at VMX, and we're excited to launch our partnership! Our first event, "Improving Patient Health Through The Gut," will take place on March 15 at 7PM CST. Please share with your teams!
