A Business Solution from

Make ToxBuddy your partner in toxicology management for dogs!

Fast Assessment

With ToxBuddy, your clinic is the go-to resource for patient care requiring toxicology assessments. Other services can take up to three phone calls to get definitive help, which can lead to frustrated clients and waste valuable time for patients.

Stress-Free Search

There's no need to sift through countless pages in a toxicology textbook to locate the information you require. With 500+ common toxins, ToxBuddy puts all the information needed for case assessment at your fingertips.

Keep Cases In-House

ToxBuddy helps keep poisoning cases within your clinic. For a practice that receives just 2 calls a week, ToxBuddy can generate a minimum of \$31,200* in captured earnings annually! Plus, fluid administration, patient monitoring, or surgery are more likely to be performed at your clinic, leading to additional revenue.

*These figures are based on cumulative costs of the exam fee, emesis induction, and toxicology report and are subject to change and are dependent on multiple factors such as location of the hospital and the average number of toxicology cases seen by that clinic on a weekly basis.

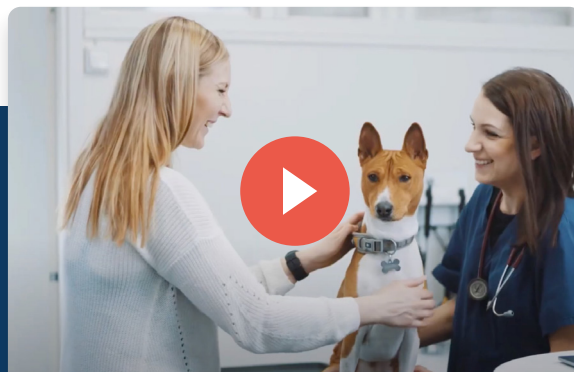

Strengthen Client Connection

You've made your practice the first call for owners. Keep it that way with ToxBuddy!

There's no time to waste with toxicology assessments. With ToxBuddy, there's:

- ✗ No waiting on hold
- ✗ No asking clients to make another call
- ✗ No client fees incurred outside of your clinic
- ✗ No waiting for answers

“ We love ToxBuddy and utilize it frequently! When we have owners call in with toxin ingestions it is our go-to resource. It saves our doctors, technicians and even receptionists so much time. It also is a great feeling knowing the information is always reliable and accurate. ”

Sarah W., Practice Manager, Lake Crest Animal Clinic

“ ToxBuddy gives me the confidence and peace of mind when treating toxic ingestions. Instead of flipping through outdated textbooks I have answers and a treatment plan in seconds. Win win for me, my staff, and most importantly, the patient. ”

Erin B., DVM, Veterinarian/Owner, Moultrie Animal Clinic
