CARECARBON REFILL REVOLUTION!!!

"CareVet Teams are dedicated to reducing our carbon pawprint while pursuing best medicine"

A Revolution You Say?

Still using plastic water bottles in your daily life? Don't know where to turn? Fear not! Maya, the lab, is here to help you with this process! CareVet HQ will be starting our journey to eliminate single-use plastics from our daily routines starting in April!!

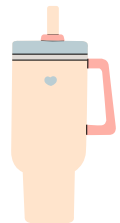

Plastic Water Bottles :(

- Plastic takes hundreds of years to break down!
- By 2050, there could be more plastic than fish in the ocean!
- 1 million plastic water bottles are purchased every minute world wide!
- Over 1 million marine animals die each year from plastic waste :(
- More than 90% of seabirds have plastic in their stomachs :(
- Micro-plastics are found within our bodies, in our bloodstream, lungs, brain, and more places!

Things To Look Out For: April – May

- Helpful tips and tricks from Maya to help you on your sustainability journey!
- More plastic-specific recycling options!
- A couple options of new reusable mugs/water bottles for team members to order here at HQ!

- Reach out to your sustainability lead, Christian Thornberry, with any questions or concerns you may have about the program so far or about the future!
