

# CareVet DVM Mentorship Program

## Gain Clinical Confidence + Build Your Network

CareVet has launched a DVM Mentorship program that pairs New Grads and Interested Associates with an experienced, like-minded CareVet veterinarian. We start by learning about what YOU would like mentoring or support in (clinical needs, leadership, communication, new service, personal, etc.) and then match you with a mentor who has experience in your area of need. The mentor will then have a call with you to learn more and “custom create” a mentoring experience specifically for you. This is in addition to any local mentoring and support you might be receiving from your hospital team. The mentorship program is completely confidential between yourself and the mentoring team.

## How Do I Join?

CareVet put together a quick survey to understand your wants and needs for mentorship. Access the survey [here](#) or reach out to your RDO or DM for the link.
